

## 3M™ Speedglas™ Selection Guide

Select the Speedglas™ helmet and Auto Darkening Filter (ADF) combination that's right for you.

**Entry**

**100F (single shade ADF)  
100V (variable shade ADF)**

**100V with Graphics**

Ideal for occassional welders and students

**Mid-Range**

**Super Light (SL)**

Designed for specialty (TIG) and quick welding tasks

**Premium**

**9100 9100 FX**

Designed with the professional welder in mind

**Premium with Air**

**9100-Air 9100 FX-Air**

Optimal respiratory protection and comfort for increased productivity and demanding environments.

Readily connect to the 3M™ Adflo™ PAPR or the 3M™ Fresh-air III Supplied Air Regulators

All Premium helmets are compatible with of any of the three Speedglas ADFs of differing sizes: 9100V, 9100X, 9100XX

### Superior optics

Known for their outstanding optical quality and performance, 3M™ Speedglas™ Auto Darkening Filters assure uniform shading and minimal distortion across the entire filter viewing area. Our wide selection of filters offers options for nearly all welding processes and unique welding needs.

## 3M™ Speedglas™ 100 ADF

The 100-Series welding helmets are available with either a variable shade ADF (100V) or a single shade ADF (100F).

Welders can choose

from the 100S-10 with a dark shade of 10 or the 100S-11 with a dark shade of 11.

	100V	100F with 100S-10 Filter	100F with 100S-11 Filter
Part number	07-0000-31-CA	07-0000-10-CA	07-0000-11-CA
Dark state	Shade 8-12	Shade 10	Shade 11
Light state	Shade 3	Shade 3	Shade 3
TIG Rating	> 10	Limited TIG	
Switching speed		0.1 ms	
UV/IR Protection		Shade 12 (permanent)	
Viewing area (approx.)		1.73 x 3.66 in (44 x 93 mm)	
Number of Sensors		2	
Battery life (approx.)		1500 hours	
Warranty		2 years	
Weight (complete assembly in ounces)		Black - 15, with graphics - 16 (same for all three filters)	

## 3M™ Speedglas™ Super Light (SL) ADF

The 3M™ Speedglas™ SL filter offers automatic on/off switching designed specifically for quick welding tasks. Its superb arc detection is ideal for specialty welding such as TIG.

	Super Light (SL)
Part number	05-0000-41-CA
TIG Rating	> 1 Amp
Weight (complete assembly)	13 ounces
Dark state	Shade 8-12

Number of Sensors	2
Battery life (approx.)	1500 hours
Warranty	2 years

## 3M™ Speedglas™ 9100 ADF

The 3M™ Speedglas™ 9100 filters come in three different sizes (9100V, 9100X, 9100XX). The 9100XX is 30% larger than any other Speedglas™ welding filter. All three feature a built-in mag plate holder, and seven user selectable dark shades, with the option to lock-in

your shade for torch and plasma cutting. A tack welding comfort mode helps reduce eye fatigue during tacking applications.

	9100V	9100X	9100XX

# 3M™ Speedglas™ 100 Series

Perfect for hobby welders, farmers, and do-it-yourselfers, as well as maintenance and construction workers, these helmets provide state-of-the-art eye and face protection while allowing wearers to express their personality with several unique graphic designs. All 100 Series graphic helmets come with a variable shade ADF (100V, Shades 8-12). The black helmet is available with variable shades 8-12, or with two different single shade ADF options (100F - shade 10 or 11).

\*A design collaboration between ERGONOMIDESIGN® and 3M.

## 3M™ Speedglas™ Super Light (SL)

At a mere 13 ounces, including the filter, the SL is lighter than any other Speedglas helmet. It is also the narrowest helmet, making it ideal for welding in very tight spaces. Grab & go—a motion sensor automatically turns ON the welding filter when you pick up the helmet, making this helmet ideal for quick welding tasks.

SL with ADF	05-0013-41-CA
SL helmet only (no ADF)	05-0013-00

## 3M™ Speedglas™ Welding Helmet 9100

The 9100 is designed for optimal comfort and protection. The radical technology behind the highly adjustable 9100 head suspension fundamentally changes not only how you wear the helmet, but also how you experience fit, stability and balance. The 9100 helmets have a smooth up-and-down pivot action that gently locks in the ‘up’ position, and their suspension keeps the helmet closer to user’s head – making the helmet feel lighter, more stable and balanced at all times. The 9100 helmet is also available with removable “blinders”, to allow you to see others working around you.

## 3M™ Speedglas™ 9100 Head Suspension

The innovative 9100 suspension conforms to your head to help increase stability, improve weight distribution and significantly reduce pressure on the most vulnerable areas. Less pressure on your head means optimal comfort that lasts all day long.

## 3M™ Speedglas™ 9100 FX

The 9100 FX includes an innovative wide-view grinding visor to give welders an all-in-one solution for more flexibility and precision. The exceptionally clear and large (8" x 4.25") visor offers a greater field of view in all directions, while a smooth flip-up pivot mechanism assures effortless transition from welding to grinding modes. The 9100 FX comes standard with Shade 5 SideWindows and a top-of-head head spark and spatter cover.

## 3M™ Speedglas™ 9100-Air and 9100 FX-Air

The 9100-Air and FX-Air combine the features of standalone helmets, 9100 and 9100 FX, with added respiratory protection. Each helmet readily connects to the 3M™ Adflo™ Powered Air Particulate Respirator (PAPR) or the 3M™ Fresh-air III Supplied Air Regulators to help provide optimal respiratory protection and comfort for increased productivity and demanding environments.

9100-Air

9100 FX-Air

To upgrade an existing Adflo™ system to one of these new helmets, please select a breathing tube on the next page, and a 9100-Series ADF of your choice (V,X, or XX).

# 3M™ Air Sources for Speedglas™ Helmets

## 3M™ Adflo™ PAPR

The Adflo™ respiratory system provides a supply of filtered air

from the blower unit via breathing tube to the headtop. The system creates a positive pressure, which together with the face seal helps prevent particles and other contaminants from entering the helmet. This system can be used with Speedglas™ 9100-Air and 9100 FX-Air helmets, and is an ideal solution where powered air respiratory protection is desired.

V-100

V-200

## 3M™ Fresh-Air III Supplied Air Systems

Two supplied air systems that allow welders to regulate the airflow and are ideal for the most demanding and extreme temperature working environments. The Speedglas™ **V-100 Vortex Air-Cooling Valve** allows the user to cool the air entering the helmet by as much as 50°F (23°C), and the Speedglas™ **V-200 Vortemp™ Air-Heating Valve** allows the user to heat it by as much as 50°F (23°C). Also available are V-300 High Pressure and V-400 Low Pressure Valves. These valves do not have heating or cooling capabilities.

## New Breathing Tubes

All Speedglas™ Breathing Tubes feature the innovative 3M™ Quick Release Swivel (QRS) Connection, to allow for a quick connection and minimize loops and kinks.

Self-Adjusting Breathing Tube SG-30W

Heavy-Duty Breathing Tube SG-40W

Sound-Dampening Breathing Tube SG-50W

## Accessories for expanded comfort and protection

### Neck and Ear Protection

Optional flame-resistant neck and ear protection accessory helps protect from molten metal, sparks, flames and UV/IR radiation. Neck protection accessory can be purchased separately and is compatible with all Speedglas™ 9100 helmets (9100, 9100FX, 9100-Air and FX-Air). **06-0500-52**

### Head Protection

Extended flame-resistant head coverage can be fastened to the helmet to help protect your head from sparks, spatter and UV/IR radiation. The extended head coverage comes standard with the Speedglas™ 9100-Air helmet, and can be purchased separately for the Speedglas™ 9100 helmet. **06-0500-51**

A shorter, Standard Headcover Accessory is also included with the Speedglas™ 9100 FX helmet. **06-0700-81**

An Extended Headcover Accessory comes standard with the Speedglas™ 9100 FX-Air helmet, and can be purchased separately for the 9100 FX helmet. **06-0700-82**

Hood

**06-0700-83**

When used instead of a belt, the BPK-01 backpack allows the Adflo™ PAPR to be worn on the back of the user for more comfort and flexibility.

# Welding Safety Education

We are committed to welding safety through creating top quality protective equipment as well as providing you with resources for welding safety education. A specially created online portal contains a collection of welding safety education and training materials. This site was created with welding instructors and students in mind, and gives you access to customized training materials, complete with videos and ready-to-use presentations on:

- Eye and Face protection
- Hearing protection
- Respiratory protection
- Proper use of PPE
- Welding Hazards
- Auto Darkening Filters
- Welding Productivity Tips

# 3M™ Speedglas™ Quality: An Inside Look\*

## Speedglas Circuit Board

Filter elements are bonded with optical adhesive for minimum distortion and maximum strength.

Silicone coating protects critical components.

Replaceable batteries in all models.

Sealed button membrane protects digital controls and reduces sweat and liquid infiltration.

Custom, multi-function programmed logic chip minimizes components and increases reliability.

Sensors mounted on circuit board minimize electro-magnetic noise interference from LC, increasing low amp arc detection capability.

## Other Circuit Boards

Analog controls are fragile and prone to moisture and particle infiltration.

Basic electronics may have difficulty detecting certain arc welding processes.

Un-bonded filter elements reduce optical clarity and are less durable.

Non-replaceable batteries eventually go dead and the lens becomes non-functional.

Excessive wiring and circuitry components increase the potential for signal interference and connection failure.

Spray coated or unprotected circuit board components are vulnerable to contamination.

Standard 4.5" x 5.25" format leaves little room on sides to protect glass filter from impact or twisting.

Other U.S. Brand Circuit Board

Asian Brand Circuit Board

\*Based on 3M Occupational Health & Environmental Safety Technical Service data and observation of certain brands' current ADF products.

### **WARNING!**

These respirators help protect against certain airborne contaminants. Before use, the wearer must read and understand the user instructions provided as a part of the product packaging. A written respiratory protection program should be implemented meeting the requirements in your jurisdiction and/or CSA standard Z94.4. Misuse may result in sickness or death. For proper use, see your supervisor, the user instructions or call 3M OH&ESD Technical Service Canada at 1-800-267-4414.

### **WARNING!**

This product is designed to help protect the wearer's eyes and face from harmful radiation including visible light, ultra-violet radiation (UV), infra-red radiation (IR), sparks and spatter resulting from welding processes. These products must be used only by qualified persons who are properly trained in their use and maintenance. Misuse may result in permanent eye injury and vision loss. Always wear complaint safety eyewear as required in your jurisdiction, such as CSA Z94.3 or ANSI Z87.1, in addition to welding helmet. For proper use, see your supervisor, the user instructions or call 3M OH&ESD Technical Service Canada at 1-800-267-4414.
