

Mouthbit Respirators

7900 SERIES MOUTHBIT RESPIRATORS

North 7900 Series mouthbit respirators offer a quick and economical method to escape non-IDLH emergency situations. Use the respirator as a “visitors escape device” or issue individual respirators to employees as a safety precaution against a potential chemical leak.

Model 7902 acid gas mouthbit is designed for emergency use at pulp and paper mills, water treatment plants, pools and spas, chemical plants and other facilities that may have accidental exposure to chlorine, chlorine dioxide, sulfur dioxide or hydrogen sulfide.

Model 7902 ammonia mouthbit is designed for emergency use where ammonia may be used, such as refrigeration.

FEATURE	FUNCTION	BENEFIT
Silicone mouthpiece	• Softer and more pliable • No latex allergens	• More comfortable to wear for longer periods when the escape route may be several minutes • Hypoallergenic
Mouthpiece has a wider opening	• More natural feel	• No need to bite down or grip hard to hold the respirator in place
Soft textured mouthpiece	• Will not slip	• More secure grip
Mouthpiece is removable	• Facilitates periodic cleaning of mouthpiece, such as after training or when dispensed to Facility visitors	• Users feel more comfortable knowing the mouthpiece has been sanitized
Large, soft and flexible nose pads are held on a balanced spring	• Stays firmly on the nose without pressure • Holds firmly without pinching	• More secure • More comfortable
Wider nose clip	• Fits a variety of facial types	• Fits most, if not all of your workers – know everyone is protected
Nylon neck strap	• Respirator can hang on the neck of the worker	• Respirator will not be lost if it is accidentally knocked out of the mouth during an emergency escape
Includes a nylon carrying bag with Velcro closure	• Protects the respirator during storage and when worn by worker	• Less chance of the respirator becoming damaged and not usable when it is needed in an emergency
Belt loops with snaps on carrying bag	• Bag can be worn by workers at all times	• Respirator is with the worker and easily accessible in case of an emergency
Zip lock storage bag	• Easy to open in an emergency • May be resealed after inspection or practice session	• No hassles when every second counts • Use the same respirator for training • Enables users to completely inspect their respirators every day
